Professional Objective

Backend Developer with **2 years of specialized experience** in **ERP Procurement Portal** development using **Node.js, Express.js, MongoDB, and MySQL**. Proven expertise in developing complex backend modules for core procurement functions, including **Sourcing, Purchase Order (PO) processing, Invoice submission, Supplier Onboarding, and integrated data operations (SAP)**. Experienced in implementing **REST API development**, role-based access control, and optimizing database performance.

Summary

- Proficient in building **RESTful APIs** and integrating them with front-end applications.
- Hands-on experience in designing and managing **NoSQL databases (MongoDB)** and **relational databases (MySQL)**.
- Strong understanding of asynchronous programming and event-driven architecture in Node.js.
- Developed and maintained applications with **CRUD operations, authentication, and authorization** mechanisms.
- Expertise in writing **optimized queries** for MongoDB and MySQL.
- Worked on **full-stack development** projects, including front-end integration using **HTML, CSS, and Javascript**
- Ability to meet strict deadlines, work collaboratively in a team, and adapt to new technologies quickly.

Technical Proficiency:

- **Backend:** Node.js, Express.js
- **Databases:** MongoDB, MySQL
- **Tools & Technologies:** Postman, Git, MongoDB Compass, MySQL Workbench, Vs Code

Professional Experience:

Project: ESA – ERP Procurement Portal (SAP-Integrated)

Description:

Developed and maintained core modules for a high-volume **ERP Procurement Portal (ESA)**, specializing in supplier-facing functionalities and internal procurement workflows. The project includes key modules such as **VM (Vendor Management), Sourcing, PO, Invoice, Advance Payment, Non-Compliance, Shipment, and a Ticket System.**

Roles and Responsibilities:

- Developed and maintained the backend of the Supplier Portal using Node.js and Express.js.
- Integrated the portal with SAP for real-time data synchronization and validation.
- Designed and implemented RESTful APIs for seamless communication between the portal and SAP.
- I worked on CRUD operations managing supplier data, payment requests, and invoices.
- Collaborated with cross-functional teams (e.g., SAP consultants, front-end developers) to ensure smooth integration and functionality.
- Debugged and resolved issues in the portal to improve performance and user experience.
- Conducted unit testing and API testing using tools like Postman.
- Documented technical specifications and user guides for the developed modules.
- Built and maintained **REST APIS** for critical workflows: Supplier Registration, PO View, Invoice Submission, and Approval Workflows.
- Implemented **role-based authentication** using **JWT**.
- Integrated backend services with **SAP** for supplier and PO synchronization.
- Improved **API processing speed** by **optimizing database queries** and implementing **server-side pagination**.
- Built **reusable middleware** for logging and access validation

Core Project Modules

- **ERP Procurement Portal (ESA):** Vendor Management (VM), Sourcing, Purchase Order (PO), Fetching & Acknowledgement, Invoice Submission & Approval Workflow, Advance Payment, Non-Compliance, Shipment Modules, and Ticket System.
- **Dashboard Analytics:** Utilized **MongoDB Aggregation** for analytics.
